

**Guardian Insurance & Annuity Co, Inc. (GIAC) STATE TAX WITHHOLDING  
GUIDELINES**  
(Last Updated 12/23/13)

GIAC's state tax withholding guidelines generally fit into one of four categories depending on the annuity contract's Tax Qualification. These categories are:

1. No State Income Tax (N): States that do not allow income tax withholding.
2. Voluntary (V): States that allow income tax withholding if federal income taxes are also withheld.
3. Mandatory/Voluntary (M/V): States that require mandatory state income tax withholding if federal income taxes are also withheld unless a person specifically opts out of state income tax withholding.
4. Mandatory/Mandatory (M/M): States that require mandatory state income tax withholding if federal income taxes are also withheld.

These categories are further broken down by the annuity contract's tax qualification.

- A tax qualified plan is an annuity in which contributions are made with before-tax dollars.
- A non-qualified plan is an annuity in which contributions are made with after-tax dollars.

Use the following table as a reference for GIAC's state tax withholding guidelines. For the specific withholding rules that apply to you, refer to your tax advisor.

State Name	State Abbreviation	Qualified (Q) and/or Non-Qualified (N)	State Tax Category	GIAC's default withholding percentage
Alabama	AL	Q & N	V	5.00%
Alaska	AK	Q & N	N	-
Arizona	AZ	Q & N	V	2.7%
